

Profile

Reppas Bros S.A., is a very well known brand in the market of industrial tools, industrial machinery and equipment. The company's main store is located in Athens, right in the middle of Athen's city center, while its secondary store is located in Pireaus. Furthermore, the company maintains a complete electronic shop that can be found at www.reppas.gr/store.

One of the company's major advantages is its brand- name. During its long presence in the market, the company have managed to establish its brand in the industry as well as the recognition that in its stores, "everything can be found" as long as it concerns industrial tools and equipment.

Currently, the company employs 30 permanent people that have an enormous experience in the field, and they are considered to be “doctors” in the industry, not only from customers but from suppliers too.

History

The company was founded by Reppas brothers in 1940. The brother's hard work and efforts helped the company to survive and grow throughout the decades and during difficult periods. During the seventies, Theodoros Reppas becomes Managing Director and enters the company into a new era.

In our days, despite the fact that the company has grown significantly, both in size and turnover, it has not lost its unique character and it still perceives its friendly family spirit.

Objective

The company's main objective is to try and serve every customer's needs, no matter how complex or difficult these needs may be.

Our product catalogue contains almost everything, from a simple screw up to a high- end electronic machine. Furthermore we provide special services to our customers and we offer them tailor made solutions, in order to fulfill their demands in the best possible way.

All of the above have helped us to build strong and close relationships with our customers and collaborators and have also helped us to gain the trust of some of the most important industrial firms and in the private and public sector.

The future

The company is trying to grow and develop continuously by following the developments in the market. One of the company's future priorities is to use every possible technological advance into the job in order to continue serving its customers with the most excellent way.
